

~ Infants ~

Wow, where has the spring gone?! We can't believe we are already heading into the summer months! The infants really enjoyed getting outside during the month of May and enjoying the beautiful weather now that it has shown up! We loved observing all the construction that is happening next door! It has been a great opportunity to introduce new noises and words to the infants worlds! We continued to take advantage of the weather by doing lots of our art projects outside like painting with our feet, sidewalk chalk, and making sand art! When we weren't outside we were having fun in the gym working on our gross motor skills. So many of our classmates are hitting some big milestones in their gross motor skills. We are seeing so many of our friends starting to pull themselves up, start crawling or taking steps! Gross motor is always a huge part of our days and we love watching our friends get moving!

In May we loved talking about things that Bloom and things we see in the garden. Our favorite art project was taking some fabric paint and made some really neat symmetrical butterflies. We even used them as a decoration at a board meeting so all the board members could see our beautiful art! Lastly, we loved planting and watching our flowers grow! We did lots of observing and talking about the changes and learning lots of new words! We can't wait to hear all these words come from our baby friends soon!

For the month of June, we are going to be exploring aquatic animals and water! We are excited to see how friends respond to seeing octopus, jellyfish, starfish, and sharks. Our water unit is always full of sensory experiences!

You will see different aquatic animals out to play with and sensory bags that will represent the ocean life. We will also have a few sensory bins! We will work on fine motor skills and problem solving when infants have to dig through blue jello to find sea animals. We will help everyone stay cool by exploring ice and water as well!

We will be reading "The Rainbow Fish" this month as well and doing a little art to go along with it! We will also work on fun craft activities and create sea animals!

Our signs for this month are ocean, fish, water and father!

This month we would like to wish Beau best of luck as he moves up to toddlers. We would also like to welcome our new friend Violet into the infant room.

We would like to wish our friends Grayson and Ellie a very Happy 1st Birthday.

Happy Summer!

-Your Infant Teachers!
