

## ~Pre-K~

In March, we had so much fun learning about the colors of the rainbow, including primary and secondary colors. The students practiced recognizing and writing sight words, worked on special group projects, and enjoyed listening to storytellers. One of the highlights of the month was celebrating St. Patrick's Day and Dr. Seuss's birthday! The children had a blast creating and setting leprechaun traps—and of course discovering the treats the leprechaun left behind!

This month we are excited to begin learning about Space, Earth, and how we can take care of our planet. As the month ends, we will also start exploring trees and plants. This will help us start to prepare for planting and gardening in the coming months. We will continue practicing new sight words, sounding out simple words, and building early reading and writing skills by creating small sentences and making more class books together.

Throughout April, we will take a deeper look at space through a variety of themed activities. A big focus will be on Earth as we talk about Earth Day and ways we can help care for our planet. The students will learn about the Three R's—Reduce, Reuse, and Recycle—and make promises about how they can help care for the Earth. We will also create rocket ships, explore the different planets, and learn about our solar system.

Another exciting event this month is Week of the Young Child, which we will celebrate with different themed activities each day. For example, on Music Monday, students will listen to soothing classical music and express their creativity through painting. We will also encourage children to bring in their own instruments for a fun show-and-share activity. Be sure to keep an eye on Homeroom for special activities, notes, and upcoming dress-up days listed on our Pre-K calendar.

We are so excited for all the fun learning and activities ahead this month!

Happy Spring,  
Your Pre-K Team
