

Infants

Goodbye March, hello April and Spring! The infants have really enjoyed the warmer weather that March has brought us, getting to go on numerous walks a day and get some fresh air! This past month the younger infants have been working hard on building their core muscles doing tummy time and practicing to sit with assistance. The older infants have been hard at work working on their gross motor skills practicing to stand and walk unassisted. They have enjoyed several sensory and art projects such as finger painting and gel and water sensory bags.

Our read-a-thon is coming to an end, the infants read a total of 310 minutes! During our time reading we found that the older ones loved engaging in the book, they loved turning the pages, feeling the different textures some books had, and talking along with you while you read to them!

The month of April our theme is Rain. The infants will enjoy lots of different water play such as using watering cans, cups, rubber ducks, ect. We will do some fun artwork using water colors and making rain themed crafts. We will also be focusing on getting outside and practicing walking, crawling, and tummy time. With the warmer weather we plan to try and get out on the playground every day!

Important notes for the month:

- Please bring in a lighter coat for warmer days and heavier coat for cooler days
- Bring home sleep sacks every Friday to be washed and returned the following week
- Please check tadpoles daily for important updates and things that are needed or we are running low on

Happy Spring! Jasmine, Heidi, Mara, and Robyn
